Installation Requirements

- Install Eclipse™ OSB Radiant Barrier with foil side inward toward attic space for roof applications, adhering to local building codes.
- See TuffStrand™ installation guide for span rating, fastener, and spacing details.
- Keep aluminum surface clean.
- Circular saw cuts must be made with foil side facing down to avoid foil damage.
- Leave a minimum of 3/4" air space between radiant barrier and insulation material.
- Torn spots on Eclipse™ OSB Radiant Barrier or damaged adhesive tape should be repaired.
- See Tuffstrand™ product information and installation instructions for proper span ratings and nailing patterns.

Application

Eclipse™ OSB Radiant Barrier is designed for applications requiring a structural panel, ideally suited for roof sheathing.

Storage & Handling

Like any other wood product, Eclipse™ OSB Radiant Barrier should be stored to avoid excessive moisture pick-up and must be covered and kept free from construction dust and moisture during storage and installation.

Certification & Technical Information

Eclipse™ is verified by RIMA-I, is certified by APA–The Engineered Wood Association, and is manufactured in conformance with APA PRP-108 and U.S. Voluntary Product Standard PS2. Eclipse™ products meet the following testing standards:

- ASTM Test Method E 96-05 (Water Vapor Transmission): < 1 perm
- ASTM Test Method E 2178-03 (Air Permeance): < .02
- ASTM Test Method E84 (Flame Spread): Class "B"
- ASTM Test Method E 84 (Smoke Development): Class "B"
- ASTM Test Method C 1371 (Surface Emittance): < .10
- ASTM Test Method C 1258-02: Pass
- ASTM Test Method C 1313-05: Pass
- ASTM Test Method C 1338-08: Pass
- ASTM Test Method D 3310-00: 1
