Mr. Terry Secret
Corrigan OSB, LLC
1923 US Highway 287 East
Corrigan, TX 75939

Dear Mr. Secret:

This letter is in reference to Hexion adhesive resins and their classification as a Low Emitting Material – Composite Wood.

Hexion's adhesive resins supplied to the Corrigan OSB, LLC, oriented strand board plant in Corrigan, TX, do not contain urea-formaldehyde resin. Resins supplied to this location are exterior grade phenol-formaldehyde resins.

These adhesive resins when cured in the products produced at this locations will not emit formaldehyde into the environment, thus being classified as a Low-Emitting Material – Composite Wood by standards such as LEED, a green building standard.

Sincerely,

Dale Leeper
PF Technology Manager
