

A Message from Our Executive Vice President of Manufacturing and Product Sales

November 16, 2020

COVID-19 is Ramping Up ... Again!

By all indications, COVID-19 is ramping up again and could be worse than before. Not only are the number of cases on the rise, so are hospitalizations. Although vaccines are in development, many months may pass before they are administered to the general public.

Remember to take these important steps to help keep yourself and others safe:

1. Maintain 6 feet between you and others while working, eating, taking a break, and doing other activities.
2. Wear a mask when you cannot be 6 feet away from someone. We must be more vigilant about wearing masks.
3. Wash your hands often.
4. Disinfect workplaces multiple times per day and anytime you change work locations.
5. Do not be afraid to ask your coworkers to stay 6 feet away or wear a mask.
6. Call Legacy Health & Wellness if you have any symptoms, including what you think are allergies.
7. Do not come to work sick.
8. Get a flu shot. We are already seeing cases of people positive for COVID and the flu, which doubles the chance for developing pneumonia and extended acute illness.

Thank you for your commitment to staying safe and healthy.
IBiZ!
